RELATED EXPERIENCE

GEORGIA TECH-CODING BOOTCAMP, SPRING SEMESTER

CODING BOOTCAMP, ATLANTA GA, JANUARY 2019 – PRESENT

- Currently enrolled and developing programming skills. See gitub link above for all applications.
- Task Manager- uses **Sequelize**, **Node.js**, **jQuery**, **AJAX**. Users create new tasks, and can use "drag and drop" functionality to move tasks from "incomplete" to "complete"
- Bamazon - a basic **MYSQL** database app, that uses **CRUD** to manipulate a mock company inventory and update it based off user orders. (**Node.js** terminal based, uses **NPM inquirer**)
- Ticket Fiend - uses **AJAX** requests to GET data from SeatGeek **API**, sorts and displays **JSON** RESPONSE in reference to user search request
